

Reppy — VOTECH / Trade-School Target List

Pilot targets · 2026-06-21

Your task, Jim: land **Customer #1** — one school that runs an Amp Academy pilot with a cohort. Work the list top-down (Lehigh Valley first, then spiral out). **The play:** free pilot for one electrical cohort → verified completion → testimonial → paid per-seat/cohort. **BASD/BAVTS is the bullseye** (it's our named Customer #1 milestone). *Not legal advice; confirm contacts before visiting. Log progress in the Status column.*

The pitch (say this)

"Free, installable, works-offline NEC courses across all four code editions, an honest AI tutor, and **verified completion you can audit** — not 'hit play and walk away.' Run it with one cohort, no cost, and see the proof. If it works for your students, we make it official per seat."

TIER 1 — Lehigh Valley (start here, this week)

12	Johnson College	Scranton, Lackawanna Co.	Electrical Construction Technology AAS	☐
13	Triangle Tech	Sunbury, Northumberland Co.	Maintenance Electricity & Construction Tech	☐

Cadence

- **Week 1:** BAVTS + LCTI in person (Tier 1). **Week 2–3:** NCC, LCCC + Tier 2 calls. Log every touch.
- **Goal:** one signed pilot (Customer #1) = your equity vesting trigger. Then #5, then #12 (the tranches).
