Everything the team needs to sell · 2026-06-21

Amp Academy — Launch Sales Plan & Kickoff

Authored by Dani Brooks (Sales Enablement) with Mari Vega (RevOps) · 2026-06-21

This is the kickoff. Welcome, team — Reppy, Longley, Jimmy, Michael (and Perry/Holt as they come in). The product is built and live. Our job now is simple to say and hard to do: **land Customer #1, prove it, repeat.** *Not legal advice; honest-state — we never claim accreditation, pass rates, or certs we don't hold.*

1 · What we're selling (in one breath)

Free, installable, works-offline NEC electrician courses across all four code editions, an honest AI tutor, and **verified completion you can audit** — with a private, FERPA-first backend (edex) so a school, VOTECH, or IBEW local can run it **per cohort**. The wedge: **we prove learning, not attendance.**

2 · Who we sell to (two motions)

- **Schools / VOTECHs (Reppy):** the institutional buyer — pilots → per-seat/cohort. Bullseye: **BAVTS (Customer #1)**, then LCTI, NCC, LCCC.
- **IBEW locals / JATCs (Michael + Jimmy):** the apprenticeship cohorts under the ~\$4,500/apprentice training budget. Home: **Local 375 (Allentown)**.
- **Consumer (Perry):** his audience funnels the top (separate Perry offer).

3 · The motion — land, prove, expand (the only flow)

Identify → Contact → Meeting → PILOT (free) → Prove (verified completion) → Paid (per-seat/cohort) → Expand - **A pilot is real only if it has:** start date · cohort size · success metric (e.g., ≥70% verified completion) · **end-of-pilot decision date.** - **Day-30 trigger:** at pilot day 30, present the per-seat quote + ask for the testimonial. (Automated reminder.) - **CA-style contracts:** 1-yr price, 3-yr at a discount, renegotiate year two.

4 · The numbers we watch (the scoreboard)

Pilots live · pilot → paid % · time-to-close · ARR booked · cohorts. **One pipeline, one weekly stand-up (30 min, Michael runs it).** *If it isn't in the pipeline with an owner and a next step, it doesn't exist.*

5 · 30 / 60 / 90 — the launch

Days 1–30 — Arm & open (this is kickoff week): - Longley finishes **QA** (the regression checklist → green on the dashboard). Nothing ships to a prospect until QA is green. - Everyone learns the **4–9 min phone script** + the **battlecard** (security answers cold). - Reppy: in-person at **BAVTS + LCTI**. Jimmy+Michael: **Local 375**. Goal: **2 meetings booked, 1 pilot agreed.** **Days 31–60 — Prove:** - First pilot **live** (cohort enrolled, tutor on, completion tracking). Weekly check-ins with the pilot lead. - Reppy/Jimmy keep top-of-funnel moving (Tier-2 schools + 743/163/81). Target: **3 pilots live.** **Days 61–90 — Convert & expand:** - Day-30 conversion on pilot #1 → **first paid cohort (Customer #1 closed → equity vesting trigger).** - Collect the testimonial; use it as the reference for the next 5. Target: **1 paid + 5 pilots in flight.**

6 · Who owns what

Person	Mission	First move
Longley	Product QA → then owns the pipeline board	Run the QA checklist to green
Reppy	Customer #1 (schools)	Visit BAVTS + LCTI this week
Michael + Jimmy	IBEW cohorts	Jimmy opens Local 375; Michael closes
Michael	Sales lead + weekly stand-up	Run the cadence; close the big ones
Perry	Consumer funnel	(his flipped-affiliate offer)

Person	Mission	First move
Holt (if/when)	World-introduction or Holt Campus	(his two-track offer)

7 · Comp — whoever sells gets paid

- **Commission MOST/LESS/LEAST:** 20% of year-1 contract / 10% year-2 / 5% year-3, **to whoever closes.**
- **Equity** is separate, milestone-earned (Customer #1 = Reppy's first vesting tranche). Nobody rides for free.

8 · The toolkit (everything in this folder)

- **Phone script (4–9 min)** — `AA_PHONE_SCRIPT`
- **Quick Reference / Battlecard** — `AA_SALES_QUICK_REFERENCE` (security/FERPA + pricing + objections)
- **Outreach emails** — `AA_OUTREACH_EMAILS` (schools, IBEW, Perry, Holt, team)
- **Online pitch** — `aa_pitch.html` (walk a prospect through it on the phone)
- **Target lists** — `team_tasks/REPPY_VOTECH_TARGET_LIST`, `team_tasks/IBEW_VISIT_LIST`

9 · The rules of the road (honest-state — protect the house)

1. **Never promise a pass rate, accreditation, or endorsement.** Sell verified completion + the product as it is.
2. **No student data changes hands until counsel clears FERPA/DPA.** Pilots run on synthetic/own-roster terms until then.
3. **Owner sends contracts; Claude/AI never auto-sends.** Reps gather interest; deals get papered by counsel (Ira).
4. **Log every touch.** A verbal "yes" that isn't in the pipeline didn't happen.

Go win Customer #1. Everything after that is a copy-paste. — Dani & Mari

Amp Academy — The 4-9 Minute Phone Script

Walk the prospect through `aa_pitch.html` while you talk · 2026-06-21 · Dani Brooks

How to use: open the online pitch on your screen (and send them the link so they follow along). Each step below maps to a slide. Times are targets — go faster if they're hot, slower if they're curious. **Listen more than you talk.** *Honest-state: never promise pass rates / accreditation / endorsements.*

□ 0:00–0:45 — Open (who/why)

"Hi [Name], it's [You] — I work with **Amp Academy**. Thanks for the two minutes. We built a set of **electrician training courses that install like an app, work with no internet, and actually *prove* a student learned the material — not just that they sat there.** I'd love to show you in about five minutes and see if it fits [School/Local]. Got your screen handy? I'll send a link." → **Send the pitch link. (Slide 1: the hook.)**

□ 0:45–2:00 — The problem they know

"Most online code training is 'hit play and walk away.' You can't tell who learned anything. For a real program — apprentices, a cohort, funding on the line — that's a problem. Sound familiar?" *(Let them agree. This is their pain.)* **(Slide 2.)**

□ 2:00–4:00 — What it is (the demo beats)

"Here's the difference. Three things:" 1. **"Install it like an app — works offline.** On a phone in a basement, on a job site, no signal needed." *(Slide 3.)* 2. **"It proves learning.** The video lessons make you answer to continue, completion is earned on a real assessment, and every student gets a **verifiable certificate** — you (or an employer) can confirm it's real." *(Slide 4 — the wedge.)* 3. **"All four NEC editions — 2017, 2020, 2023, 2026 — plus an honest AI tutor** built to give the code article and **never make up a value.** It even speaks Spanish." *(Slide 5.)*

□ 4:00–5:30 — Why it fits THEM

- **School/VOTECH:** "Run it with one electrical cohort. Your instructors keep teaching; this gives them auditable proof and a tutor that's on 24/7."
- **IBEW/JATC:** "Drop it into one apprentice class. It sits under your training budget and gives the JATC verified records." **(Slide 6.)**

□ 5:30–7:00 — The offer (make it easy)

"Here's the easy part: **run a free pilot with one cohort.** No cost, no commitment. We set a start date, a class size, and a simple success bar — say, most students hitting verified completion. At day 30 we look at the numbers together. If it worked, we make it official **per seat or per cohort** — and it sits well under what training already costs you." **(Slide 7 — pilot → paid.)**

□ 7:00–8:00 — Trust (only if they ask, or to preempt)

"On privacy — it's built **FERPA-first**: student data is minimized, **nothing personal lives in the app on the device**, it's encrypted, access is locked down row-by-row, and there's an audit trail. We'll sign a data agreement before any real student info is involved." *(Battlecard has the full answers — don't wing it.)*

□ 8:00–9:00 — Close (always ask for the next step)

"Can we get **15 minutes in person** so I can put it on a phone in your hands and we pick a cohort for the pilot? What's better — [day] or [day]?" → **Book the meeting. Then log it in the pipeline with the date.** *(No next step = no deal.)*

If you only have 4 minutes

Open (0:45) → Wedge: "it proves learning, verified completion" (90s) → "free pilot, one cohort, look at day 30" (60s) → "15 minutes in person, [day] or [day]?" Done.

Never say

- "It's accredited / approved / endorsed." □ (It isn't — sell verified completion.)
- "It guarantees they'll pass." □

- "Send me all your students' data." ☐ (Pilot first; DPA before real PII.)

Always do

- Send the link so they see it. · Ask for the meeting. · Log it. · Hand security questions to the battlecard answers verbatim.

Amp Academy — Salesman's Quick Reference (Battlecard)

Keep this open on every call · 2026-06-21 · Dani Brooks · honest-state

The acronym you were reaching for is **FERPA** — the federal student-privacy law schools care about. Below are the word-for-word answers so nobody freezes. Only say what's true. Never claim a certification we don't hold.

□ SECURITY & PRIVACY — say it like this

"Is our students' data safe?"

"Yes — it's built **FERPA-first** (that's the federal student-privacy standard). Four things: **(1)** we **minimize data** — the courses run **offline on the device with no personal student data stored in the app**; **(2)** the backend is **encrypted** in transit and at rest; **(3)** access is **locked down row-by-row** so a school only ever sees its own people; **(4)** every access is **logged in an audit trail you can review**. And we sign a **data agreement (a DPA)** before any real student information is ever involved."

Quick-fire facts (memorize): | They ask | You say | ---|---| | "FERPA?" | "Built FERPA-first by design; DPA signed before real student data." | | "Where's the data hosted?" | "Encrypted in a managed, access-controlled cloud database; row-level isolation per school." | | "Who can see it?" | "Only that school's authorized users. Default-deny; everything audited." | | "Is it on the kids' phones?" | "No personal data on the device — the course works offline; records live on the secure backend." | | "Do you sell data / ads?" | "Never. No ads, no data sales. Not our model." | | "SOC 2 / formal audit?" | **(honest)** "We're built to those principles; a formal third-party audit is on our roadmap, not yet certified. Happy to share our security design." | | "Can we get a data agreement?" | "Yes — we provide a DPA; your counsel reviews before any real PII." |

Three letters to know: **FERPA** (student privacy) · **PII** (personal info — we minimize it) · **DPA** (the data agreement we sign). If you remember nothing else: "*FERPA-first, no personal data on the device, DPA before any real student info.*"

□ PRICING — the easy numbers

- **Pilot: FREE**, one cohort. (Always lead here.)
- **Institutional: \$49 / student / course · \$129 / seat / year (all-access) · \$3,000–\$6,000 / cohort or site/year.**
- **Anchor:** sits well under the ~\$4,500/apprentice/yr schools/JATCs already spend on training.
- **Consumer (Perry/ECC):** \$99 one-time (all editions) or ~\$19.99/mo — *don't quote consumer to institutions.*
- **Contracts:** 1-year, or **3-year at a discount** (renegotiate year two). Don't discount the pilot — it's already free.

□ WHAT'S INCLUDED (the value list)

All four NEC editions (2017/2020/2023/2026) · installable + **works offline** · **verified completion** + **verifiable certificate** · **honest AI tutor** (gives the code article, never invents a value; **English + Spanish**) · Load Calculator + estimator tools · one Campus, one icon · instructor + admin guides · privacy-first records.

□ OBJECTION HANDLING

Objection	Comeback
"We already use [Holt / Mike Holt / free YouTube]."	"Great — students should use it all. The difference is proof : we give you auditable verified completion , not just views. Run a free pilot beside it and compare."
"Our instructors won't want it."	"It doesn't replace them — it backs them up : a 24/7 tutor and the record-keeping they hate doing. They teach; it proves."
"No budget."	"The pilot's free . We only talk money after you've seen it work — and then it's under what you already spend per apprentice."
"Is it accredited?"	(honest) "We don't claim accreditation. What we give you is verifiable completion you can stand behind — that's the point."
"Sounds complicated to set up."	"It installs like an app from a link — no app store, no IT project. I'll set the pilot cohort up with you."

Objection	Comeback
"Send me info."	"I'll send the one-pager and book 15 minutes to put it in your hand — [day] or [day]?" (Always trade info for a meeting.)
"We're worried about student data."	<i>(Use the SECURITY block above — verbatim.)</i>

□ THE ONLY GOALS OF A CALL

1. They **see** the product (send the link / book the demo). 2. You get a **next step with a date**. 3. You **log it**. *Whoever closes gets paid (MOST/LESS/LEAST). Go.*

Amp Academy — Initial Outreach Emails

Ready to personalize & send · 2026-06-21 · Dani Brooks · Owner sends — never auto-sent

Replace every [bracket]. Keep them short — the goal of each email is **one thing: book 15 minutes**. Attach/link the **online pitch** ([aa_pitch.html](#) once hosted) and the **Overview PDF**. *Honest-state: no accreditation/pass-rate claims.*

1 · SCHOOL / VOTECH — for Reppy

Subject: A free pilot for your electrical cohort — proof, not just videos

[First name] —

I'm Jim Repasch, working with **Amp Academy**. We've built electrician training that **installs like an app, works offline, and proves a student actually learned** — completion is earned on a real assessment and every student gets a **verifiable certificate**, across all four NEC editions (2017–2026), with an honest AI tutor (English + Spanish).

I'd like to offer **[School]** a **free pilot with one electrical cohort** — no cost, no commitment. We set a start date and a simple success bar, and look at the results together at day 30.

Could I get **15 minutes** to put it on a phone in your hands? I'm in the Lehigh Valley — happy to come by. Does [day] or [day] work?

Thanks, Jim Repasch · Amp Academy · [phone] · [email] · [link to pitch]

2 · IBEW LOCAL / JATC — for Jimmy (intro) + Michael (close)

Subject: From Jimmy Christmas — training that proves the apprentice learned it

[Training Director] —

Jimmy Christmas here — [36 years in the trade, IBEW out of Bethlehem]. I've been looking at training tools and found one worth your time: **Amp Academy**. It installs like an app, **works offline on a job site**, covers **all four NEC editions**, has an honest code tutor (won't make up a value), and — the part that matters for a JATC — it gives you **verifiable completion records**, not just "they watched it."

My partner Michael and I would like to set up a **free pilot for one apprentice class**. It sits under your existing training budget and gives you auditable records.

Can we stop by the hall for **15 minutes**? [day] or [day]?

Jimmy Christmas & Michael Lukas · Amp Academy · [phone] · [link]

3 · PERRY (ECC partner — the flipped offer)

Subject: Your partner page — flipped. You earn, on the app you help make true.

Perry —

You run a partner program where folks sell your memberships for a commission. **I want to do that in reverse** — make you Amp Academy's partner. You do what you already do best — **make the videos using the app, check the tests, sign the code, and promote with your own coupon code** — and you **earn an escalating share** (your own mechanics: coupon, per-sale, monthly payout, 1099 over \$599). I've got it laid out as three steps; let's start with the first.

15 minutes this week? — Michael · [phone]

4 · MIKE HOLT (back-pocket — owner discretion, two tracks)

Subject: A platform for the Holt Campus — your content, our software

Mike —

Quick idea worth a conversation. We've built a platform — installable, offline, **verified completion**, an honest tutor, all NEC editions — and an institutional backend. **Two ways we could work together:** you come in and help us **introduce it to the world**, or you **run it as your own — "the Holt Campus"** — **your content on our software**, and we power it behind the scenes. Either way it's built to make you money without the tech headache.

Worth 20 minutes? — Michael Lukas · [phone]

(Internal note: ceiling 10% equity (Track A) or platform royalty (Track B) — see the Holt playbook. Owner sends only when ready.)

5 · TEAM KICKOFF — Michael → the crew

Subject: We're live. Let's go sell it. (Kickoff)

Reppy, Mike, Jimmy —

Amp Academy is **built and live**. Everything you need is in one place: the **phone script**, a **quick-reference** for the tough questions (security, pricing), your **target lists**, and a link you can walk anyone through in five minutes. Mike — your first job is the **QA checklist** (it feeds my dashboard, and yes I'll be on you ☺). Reppy — **BAVTS and LCTI** this week. Jimmy — let's set **Local 375**.

The rule is simple: **whoever closes gets paid**. Land one pilot and the rest is copy-paste. Weekly 30-minute stand-up starts [day]. Let's build something we sell for real money and go live our lives.

— Michael
